Provinces and Territories of Canada Project

Overview
Your assignment is to research a specific province or territory by answering the questions provided below. Once your research is completed you will "mind map" your information on chart paper and then using Claris HomePage you will create a web page featuring information from the following areas (Major Cities, Major Landforms, Natural Resources, Tourism, Location) These web pages will be posted on our new Victoria Village School web site. Sweeeeeet!

Project Components

(1) Major Cities
What is the capital city of your province or territory?
Are there other important cities? List them.

(2) Major Landforms
•Landforms are natural features of the earth’s surface (e.g., mountains)
Describe the physical appearance of your province or territory?
Are there any major mountains, hills, rivers, lakes or other special landforms? List them.

(3) Natural Resources
•Natural resources are things produced by nature that are useful to people
What kinds of crops, resources and products are found in your province or territory?
How do we use these crops, resources and products in our daily lives?

(4) Tourism
•Tourism occurs when people travel to visit another place for business or pleasure
If I came to your province or territory what are the 3 most interesting places I should visit?
Provide a description and reasons for each of your 3 choices.

(5) Location
Where is your province located? What is to the North, South, East and West of it?
Please label a map of your province that includes the major cities, major land forms and natural resources.

Date Assigned: Wednesday September 17
Research Due: Wednesday October 8
Web Page Due: Wednesday October 29
